

AMERICAN AUTOMATED CONTROLS

NEW PRODUCT INTRODUCTION!

Perc-Rite® DRIP SYSTEM WITH TOUCH SCREEN :

This operator interface features state of the art process control for Perc-Rite® pump and filtration units and Drip Dispersal Systems

TYPICAL MODEL

DP4324-DAB124-EJ2LX(14)Z

Up to 5 FILTERS

Up to 32 ZONE

Up to 6 ZONE MASTERS

Up to 6 ZONE RETURNS

HMI Interface

The controller interaction is a two way process. The PLC contains the operating program. The HMI (Human Machine Interface) contains all graphical and other interface information. In combination the system is an interactive visual representation of what is taking place from the control panels' point of view. If you lose your HMI it does not affect the program that is running. The control panel will run independent of the HMI under any condition, assuming the program has not been lost from the controller.

General Window

This is the window that appears when your HMI boots. It is always active and gives the operator a significant amount of control as well as showing the status of the system in real-time. Most things on this menu are interactive and some have sub menus. The TOUCH SCREEN will take you through all of the visual display screens and functions available to the operator.

Specification Assistance

American Manufacturing Company Inc. designs and builds most any integrated on-site wastewater or water system controller that is typically used today. American Manufacturing becomes involved with the entire operation of the system whether potable water, process water, or wastewater. American has on-staff Professional Engineers, designers, soils scientists and trained sales personnel with state-of-the-art experience in control systems. American maintains and supports Drip Dispersal patents 5,200,065 - 5,984,574B-6,261,452B1

FEATURES :

- STANDARD ON "DP4" SERIES SYSTEMS
- USER FRIENDLY DISPLAY
- PROGRAMMABLE OPERATOR SETTINGS
- HAS ITS OWN AUDIBLE ALARM TO SIMPLIFY TROUBLESHOOTING
- 4 CHANNEL FAILURE INDICATOR W/REMOTE ALARMING
- DATA LOGGING & ACQUISITION
