PERMEAMETER

SHALLOW - SLOW RATE - CONSTANT HEAD - INVERTED

CONSTANT HEAD PERMEAMETER

The Compact Constant Head Permeameter is an advanced portable piece of field equipment for measuring saturated hydraulic conductivity (K_{sat}) of the vadose (unsaturated) zone in the natural soil. The standard unit shown here can be used to measure K_{sat} from the soil surface to shallow depths. Depth of measurement can be increased to 4 meters using other devices, also available from American Manufacturing.
